

The Title Goes Here with Each Initial Letter Capitalized

(Use the Microsoft Word template style: *Paper Title*)

Author's Name^{1, a)} and Author's Name^{2, 3, b)}

(Use the Microsoft Word template style: *Paper Author*)

¹(Use the Microsoft Word template style: Author Affiliation) Replace this text with an author's affiliation (use complete addresses). Note the use of superscript "a)" to indicate the author's e-mail address below.

Use b), c), etc. to indicate e-mail addresses for more than 1 author.

²Additional affiliations should be indicated by superscript numbers 2, 3, etc. as shown above.

³You would list an author's second affiliation here.

^{a)}Corresponding author: your@emailaddress.xxx

^{b)}anotherauthor@thisaddress.yyy

(Use the Microsoft Word template style: *Author Email*)

Abstract. The AIP Proceedings article template has many predefined paragraph styles for you to use/apply as you write your paper. To format your abstract, use the Microsoft Word template style: *Abstract*. Each paper *must* include an abstract. Begin the abstract with the word "Abstract" followed by a period in bold font, and then continue with a normal 9 point font.

FIRST, SECOND, AND THIRD LEVEL HEADINGS (FIRST LEVEL HEADING)

(Use the Microsoft Word template style: *Heading 1*)

This document was prepared using the AIP Proceedings template for Microsoft Word. It provides a simple example of a paper and offers guidelines for preparing your article. Here we introduce the paragraph styles for Level 1, Level 2, and Level 3 headings. Please note the following:

- In this template we note whether each heading is Level 1, 2, or 3 – for example, "(Second Level Heading)." This is for guidance only; your article headings will, of course, not need those notations.
- Under each heading we have noted which paragraph style to use – for example, "(Use the Microsoft Word template style: Heading 2)." Again, those notes are not part of the headings. Their purpose is to advise you of the name of the style defined in the AIP Proceedings Word template.

To format a paragraph, use the Microsoft Word template style: *Paragraph*.

Do not include any headers, footers, or page numbers in your document. They will be added to your article PDF by AIP Publishing, so please do not amend this template to add them to your paper.

How to Apply the AIP Proceedings Template Paragraph Styles (Second Level Heading)

(Use the Microsoft Word template style: *Heading 2*)

Here is how to display a pop-up window from which to select and apply the AIP Proceedings template paragraph styles:

Click here to display the Styles window – making it easy to choose and apply the AIP Proceedings template styles.
To apply a style to a paragraph, click anywhere in the paragraph text then click on the appropriate style listed in the Styles window.

How to Use this Template (Second Level Heading)

(Use the Microsoft Word template style: *Heading 2*)

You can edit or delete the content provided in this template and replace it with the text and figures of your article. Please be sure you do not accidentally leave any of this text as part of your paper!

Heading with Each Initial Letter Capitalized (Second Level Heading)

(Use the Microsoft Word template style: *Heading 2*)

Apart from prepositions and articles, all words in second and third level headings should have their initial letters in uppercase. Prepositions are words like “for,” “from,” “with,” “in,” “off,” and articles include words such as “an,” “a,” “the.”

This is the paragraph spacing that occurs when you use the [ENTER] key.

Heading with Each Initial Letter Capitalized (Third Level Heading)

(Use the Microsoft Word template style: *Heading 3*)

As with first and second level headings, all words except prepositions and articles (see above) should appear with initial letters in uppercase.

This is the paragraph spacing that occurs when you use the [ENTER] key.

MATHEMATICS (FIRST LEVEL HEADING)

(Use the Microsoft Word template style: *Heading 1*)

Here we provide some basic advice for formatting your mathematics, but we do not attempt to define detailed styles or specifications for mathematical typesetting. You should use the standard styles, symbols, and conventions for the field/discipline you are writing about.

A Note on Microsoft Word’s Equation Editors (Second Level Heading)

(Use the Microsoft Word template style: *Heading 2*)

From Word 2007 onwards, Microsoft Word provides two “Equation Editors,” which, for ease of reference, we’ll call “Old Style Equations” and “New Style Equations.”

- **“New Style Equations”** (Word 2007 onwards): With Word 2007 Microsoft introduced a powerful new built-in Equation Editor that enables input of sophisticated mathematics typeset (usually) in the Cambria Math font. You access it from the Insert menu.

- **“Old Style Equations”** (Word 97–Word 2003): For versions of Microsoft Word between Word 97 and Word 2003, mathematical input was created by an add-in: Inserting and editing a “Microsoft Equation 3.0 object,” typically by *Insert* ⇒ *Object* and selecting “Microsoft Equation 3.0.”

Newer versions of Microsoft Word (Word 2007 and onwards) still support the original “Old Style Equations” method of creating mathematics by inserting an equation via *Insert* ⇒ *Object* and selecting “Microsoft Equation 3.0.”

Which Microsoft Word Equation Editor Should I Use? (Second Level Heading)

(Use the Microsoft Word template style: *Heading 2*)

Due to technical requirements of OpenType font technology, Microsoft Word’s “New Style” Equation Editor works only with fonts specially designed for mathematical typesetting. Unless you have obtained and configured new OpenType math fonts, it is highly likely that your installation of Word will use the Cambria Math font for all mathematics created with the “New Style” editor. Using the Cambria Math font for mathematics and Times Roman for your text will cause a mismatch in the visual appearance of your article, so, for consistency, we prefer authors to use the “Old Style” Equation Editor because it is straightforward to amend the size/style of the fonts it uses.

Formatting and Inserting Equations (Second Level Heading)

(Use the Microsoft Word template style: *Heading 2*)

Equations should be centered with equation numbers on the right-hand side (flush right). Achieving a pleasing layout of equations can be tricky in Microsoft Word, so here are some tips. You can either:

1. Copy, paste, and edit the sample equation provided (recommended), or
2. Manually insert an equation and equation number

Copy, Paste, and Edit a Sample Equation (Third Level Heading)

(Use the Microsoft Word template style: *Heading 3*)

To use this “Old Style Equation” as a “template,” highlight the entire line, then use cut and paste to the new location. Note that the equation number will automatically update (increment).

$$\frac{d[F_1]}{d\omega_2} = SAm_2 \cos \omega, \quad \frac{d[F_1]}{d\omega_3} = SAm_2 \cos \omega \quad (1)$$

Manually Inserting an Equation and Equation Number (Third Level Heading)

(Use the Microsoft Word template style: *Heading 3*)

If you prefer to manually insert and number equations, follow this step-by-step guide:

1. Make sure you can see “hidden characters” by switching on “show invisibles” from the Home menu (it looks like this: ). This allows you to see paragraph markers (¶) and tab characters (→), which are usually hidden from view.
2. Create a blank paragraph by pressing [ENTER].
3. Format your new blank paragraph by applying the Microsoft Word template style: *Equation*. The *Equation* paragraph style sets up the tabs so that you can center the equation and have an equation number appear at the right.
4. Place your cursor at the start of your new paragraph and press the [TAB] key twice.
5. Place your cursor between the tab characters (→) and insert your equation using *Insert* ⇒ *Object* ⇒ *Microsoft Equation 3.0*.
6. To add an equation number, place your cursor at the end of the paragraph (just before the paragraph markers (¶) and after the second tab character (→)).
7. On the *Insert* tab, in the *Text* group, click *Quick Parts* and then click *Field*:

8. A dialog box should appear:

9. From the list of *Field Names* on the left of the dialog box, select *ListNum*.
10. From the list of *Field properties* on the right, select the “Equations” *List name* and click OK. You should now see an equation number in parentheses: e.g., (3).

OTHER SPECIFICATIONS (FIRST LEVEL HEADING)

(Use the Microsoft Word template style: *Heading 1*)

Figures, tables, and equations must be inserted in the text and may not be grouped at the end of the paper. Important: A miscount of figures, tables, or equations may result from revisions. Please double check the numbering of these elements before you submit your paper to your proceedings editor.

Figures (Second Level Heading)

(Use the Microsoft Word template style: *Heading 2*)

If you need to arrange a number of figures, a good tip is to place them in a table, which gives you additional control of the layout. Leave a line space between your figure and any text above it, like this one:

(a)

(b)

FIGURE 1. To format a figure caption use the Microsoft Word template style: *Figure Caption*. The text “**FIGURE 1**,” which labels the caption, should be bold and in upper case. If figures have more than one part, each part should be labeled (a), (b), etc. Using a table, as in the above example, helps you control the layout

Cite all figures in the text consecutively. The word “Figure” should be spelled out if it is the first word of the sentence and abbreviated as “Fig.” elsewhere in the text. Place the figures as close as possible to their first mention in the text at the top or bottom of the page with the figure caption positioned below, all centered. Figures must be inserted

in the text and may not follow the Reference section. Set figure captions in 9 point size, Times Roman font. Type the word “**FIGURE 1.**” in bold uppercase, followed by a period.

Color Figures (Third Level Heading)
(Use the Microsoft Word template style: *Heading 3*)

Authors are welcome to use color figures within their article. For online publication, there are no costs added for color figures. However, for *printed proceedings* (if requested by your conference organizer), there is an additional cost. Please consult directly with your conference organizer. If your conference organizer has asked AIP Publishing to produce printed copies (many ask AIP Publishing for online-only publication), then all figures will be printed in black-and-white unless you make specific arrangements with your organizer(s) to include color figures in your article and pay to them the associated fee(s) they request. We advise that many color figures can be printed in black-and-white with no loss of information; however, some figures do lose information when reproduced in black-and-white. Check your figure legends carefully and, if your figures are to be printed in black-and-white, remove from your text/descriptions any references to color.

Tables (Second Level Heading)
(Use the Microsoft Word template style: *Heading 2*)

Due to the wide range and complexity of tables, we simply offer an example for guidance. Please follow the style for table (and figure) captions.

TABLE 1. To format a table caption, use the Microsoft Word template style: *Table Caption*. The text “**TABLE 1,**” which labels the caption, should be bold and all letters capitalized. Center this text above the Table. Tables should have top and bottom rules, and a rule separating the column heads from the rest of the table only.

Column Header Goes Here	Column Header Goes Here	Column Header Goes Here
Row Name Here	x	x
Row Name Here	x	x
Row Name Here	x	x

FINAL KEY POINTS TO CONSIDER (FIRST LEVEL HEADING)
(Use the Microsoft Word template style: *Heading 1*)

Here are the main points you need to follow (the AIP author template packages contain comprehensive guidance):

- Write and prepare your article using the AIP template.
- Create a PDF file of your paper (making sure to embed all fonts).
- Send the following items to your conference organizer:
 - PDF file of your paper
 - Signed Copyright Transfer Agreement
 - (If it applies) Copies of any permissions to re-use copyrighted materials in your article (e.g., figures from books/journals)

Font Embedding (Second Level Heading)
(Use the Microsoft Word template style: *Heading 2*)

As the author and creator of your article PDF, you have the most intimate knowledge of *exactly* what the PDF should display. We ask all authors to carefully check their article PDF prior to submission. Perform visual inspections to detect subtle font errors and ensure that all fonts are embedded. With the wide range of tools and software that authors use to create PDFs, and the number of devices and platforms that readers use to view/print them, font embedding by authors is not only “nice-to-have”; it is *essential*.

Why Should I Care About Font Embedding? (Third Level Heading)
(Use the Microsoft Word template style: Heading 3)

Embedding fonts into your PDF file is critically important for two reasons:

1. Commercial printing companies are unable to print PDFs without the correct fonts embedded.
2. To ensure that your online article PDF file displays and prints correctly for everyone who wants to read your work.

Readers of scientific articles use an ever-increasing range of devices and applications to access, view, and print PDFs – from smart phones and tablets to desktop computers running any one of a number of operating systems. To ensure that readers of your article can display and print it correctly, it is important for your article's PDF file to be truly *portable*: Your PDF file needs to be fully “self-contained.”

Summary: Points to Consider when Preparing Your Paper
(Use the Microsoft Word template style: *Heading 2*)

Well prepared papers enable rapid publication and reduce unnecessary work for your proceedings editor(s). The following points summarize the key issues you need to comply with when preparing your paper for AIP Proceedings.

- **Check your article PDF file!** It is not uncommon for errors to appear in PDFs generated from Microsoft Word – corrupted math, figures reflowing, etc. It is absolutely essential to very carefully check your article PDF file before sending it to the proceedings editor(s).
- **Do not add page numbers or headers/footers.** Our article templates deliberately do not include these, so please do not add them.
- **Do not alter the margins of our templates.** They are carefully designed for AIP's production process: Altering them can cause significant delays.
- **Prepare and format references with care.** Please prepare and format your references in accordance with the examples supplied with the author templates and documentation.
- **Embed all fonts into your article PDF.** The importance of font embedding is discussed in the section *Font Embedding* (above). PDFs supplied without embedded fonts are often completely unusable for printing or publication purposes. In such cases, we have to return those PDFs to the proceedings editors for font embedding. Failure to embed fonts can cause unnecessary inconvenience to your proceedings editor(s) and publication delays for other authors. Failure to provide a replacement paper in a timely fashion may result in an article being removed from the proceedings.
- **Use clear, legible graphics and diagrams.** Readers of your paper will be grateful. If they cannot read it, they are unlikely to cite it.
- **Do not use copyrighted material without permission.** Papers using copyrighted material without appropriate permission and acknowledgment will be excluded from the proceedings.
- **No 1-page papers please.** 1-page, abstract-only contributions are not acceptable and will be excluded from the proceedings.
- **Avoid large PDF files (10 MB maximum, ideally).** For the benefit of your readers, we recommend keeping your article PDF file below 10 MB. This is a recommendation, *not a requirement*.

Where to Find Further Information

(Use the Microsoft Word template style: *Heading 2*)

We warmly invite you to visit our online platform, *Scitation*, where you can find further help/advice and publishing policies for AIP Proceedings:

- For authors: <http://proceedings.aip.org/authors>
- For conference organizers: <http://proceedings.aip.org/organizers>

ACKNOWLEDGMENTS

(Use the Microsoft Word template style: *Heading 1*)

Ut wisi enim ad minim veniam, quis nostrud exerci eliton ullamcorper suscipit lobortis nisl ut aliquip ex en commodo consequat. Duis te feugifacilisi per suscipit lobortis nisl ut aliquip ex en commodo consequat. Lorem ipsum dolor sit amet, consectetur adipiscing elit, sed diam nonummy nibh euismod tincidunt ut laoreet dolore magna aliquam erat volutpat.

The reference section will follow the “Acknowledgment” section. References should be numbered using Arabic numerals followed by a period (.) as shown below, and should follow the format in the below examples.

REFERENCES

(Use the Microsoft Word template style: *Heading 1*)

(Vancouver System: The reference and citation are written by number, in the order of first appearance, giving the names of the authors, the journal name, volume, first page number only or page range or CID number, and year. Citation in the main text can be given by indicating references by number(s) in square brackets. An example is:

According to [1], the Ising spin follows the Energy Function)

1. M. P. Brown and K. Austin, *The New Physique* (Publisher Name, Publisher City, 2005), pp. 25–30.
2. M. P. Brown and K. Austin, *Appl. Phys. Letters* **85**, 2503–2504 (2004).
3. R. T. Wang, “Title of Chapter,” in *Classic Physiques*, edited by R. B. Hamil (Publisher Name, Publisher City, 1999), pp. 212–213.
4. C. D. Smith and E. F. Jones, “Load-cycling in cubic press,” in *Shock Compression of Condensed Matter-2001*, AIP Conference Proceedings 620, edited by M. D. Furnish *et al.* (American Institute of Physics, Melville, NY, 2002), pp. 651–654.
5. B. R. Jackson and T. Pitman, U.S. Patent No. 6,345,224 (8 July 2004)
6. D. L. Davids, “Recovery effects in binary aluminum alloys,” Ph.D. thesis, Harvard University, 1998.
7. R. C. Mikkelsen (private communication).
